COMMENT:

1. Improvements to Key Bridge are planned whether or not CIA goes to Langley. A Constitution Avenue Bridge is planned whether or not CIA goes to Langley. The extension of the George Washington Memorial Parkway has been authorized since 1930 and would accompany CIA's locating at Langley. The State of Virginia has committed funds to widen Route 123 from Route 193 to the Parkway; this will provide four-lane access to the Key, Memorial and Constitution Avenue Bridges.

2. Fairfax County has agreed to provide sewer service for which CIA will pay, as would any other user, a sound commercial transaction from the standpoint of the County.

3. Falls Church has agreed to provide water on an equally sound commercial basis.

4. Official Fairfax County estimates anticipating a substantial population growth in this area whether or not CIA locates there. One of the reasons for selecting Langley is its convenience to the present residential location of the Bulk of CIA's employees, so that only a small number are expected to change their residences.
